- [ ] 15. grass
- [ ] 16. nest
- [ ] 17. tulip
- [ ] 18. daffodil
- [ ] 19. bonnet
- [ ] 20. jelly bean

How to play: Easter Word Bingo (Sample)

Project 6B070B39. These instructions belong to this exact set of 2 cards.

1. Give every player a card and something to mark it with. Keep the full card ID visible.

2. Open this project in the web host, or call words from the printed list in a random order. Call each word only once per round.

3. Players mark matching words. The center logo is your free space and is already marked.

4. A complete horizontal row, vertical column, or either full diagonal satisfies the Bingo rule. No full-card rule is used.

5. A player who has a line can call Bingo. Enter their full card ID in the web host to check the marked cells and completed lines.

Web checks use only the calls recorded in the current web round. A manual paper call is not recorded automatically. Meeting the line rule does not prove who was first, and multiple players can win together.

Start a new round to clear calls and shuffle a new calling order while keeping the same cards. Save your project JSON to continue on another device.

Printing: choose the matching paper size, portrait orientation, and Actual size / 100%. Turn off extra scaling. Check one sheet before printing the full batch.
