How to play: Office Buzzword Bingo (Sample)

Observe events or items during the agreed activity. Mark a matching entry only when it happens. Agree on what counts before play. The website does not detect real-world events.

Give each player a card. The center logo is your free space and starts marked.

A full row, column or diagonal is a line. Ask the organizer to confirm a win manually. The web caller and checker do not verify these observations or personal conditions.

Save the project JSON if you need the same layouts again. Print at Actual size / 100%. Use one card per sheet for generous handwriting room.
